teaching

Jane teaches surface design, mixed media, printmaking, art quilting and the business side of being an artist extensively around the US and internationally, most recently in South Korea and Australia, as well as online.

statement

"I am particularly drawn to fish, birds, and insects as subjects. The fact that these creatures' homes are much broader than four walls, a floor, and a roof makes for an interesting allegory. Perhaps if we humans looked at 'home' as this much larger, boundless space around us and not define it by the artificial barriers we construct, we might be better stewards of our planet."
